

# Patterns for *Hotoke dô*.

Front plate

These circles mark placement of the side hinge.

Remember that there is a c. 1" overlap both front and back on the right side, with the back plate being the overlapping plate.

Back plate

If you are making a *ryô awase dô* version, cut both sides of the back plate with the curve, omitting the hinge placement.

For a more "fancy" *hotoke dô*, remove the gray areas and replace with normal *kanagu mawari*, which you must make separately.
